DEA: FT9237947

Registered Nurse (LA): RN140896 (inactive status)

Active Certifications:

Board Certification in Emergency Medicine (ABEM)
BLS, ACLS, PALS, ATLS

Projects

Institutional Quality Measure

I worked with a faculty trauma surgeon to ensure that our facility provided access to large-bore suction to reduce oropharyngeal evacuation times so that visibility may be more easily improved during intubation.

Quality Improvement Project

I created a pediatric airway kit to improve access to readily available supplies for emergent endotracheal intubation for children.

Pre-Hospital Mass Transfusion Protocol Predictor Project

I worked with a team on a research project compiling and analyzing pre-hospital flight crew data with the intention of developing a system for prediction and more rapid activation of mass transfusion protocols in trauma patients.

Expert Witness/Legal Consultation

I am available for expert witness consultation in the field of Emergency Medicine.
