Curriculum Vitae

EDUCATION

Philadelphia College of Pharmacy
Philadelphia, PA
Doctor of Pharmacy Graduate 2013

September 2007 – May 2013

Southern New Hampshire University
Manchester, NH
Master's in Business (Health Care Concentration) Graduate 2022

November 2020 – September 2022

PROFESSIONAL EXPERIENCE

AtlantiCare Regional Medical Center
Ambulatory MTDM Pharmacy Manager
Atlantic City & Pomona, NJ

June 2023 – Present

- Provide leadership and oversight for pharmacy clinical ambulatory operations, ensuring the delivery of high-quality patient care and efficient workflow at the pharmacy hospital-based clinics.
- Manage ambulatory Medication therapy disease management (MTDM)/collaborative practice pharmacy team and population health pharmacist within the healthcare organization.
- Recruit, train, and evaluate clinical staff, fostering a supportive and collaborative work environment. Addressed staffing needs and managed schedules to ensure adequate coverage.
- Collaborate with physicians and other healthcare providers to optimize patient outcomes through evidence-based medicine protocols.
- Develop, implement, and enforce clinical policies and procedures, ensuring compliance with regulatory standards and best practices through partnerships with Vizient.
- Collaborated with our informatics team to perform system testing and enhancements through Oracle Cerner for the pharmacy hospital-based clinics in ambulatory care.
- Monitor and assess the quality of care provided, identifying areas for improvement and implementing quality improvement initiatives. Conduct regular audits and performance evaluations.
- Ensure the clinic complies with all relevant regulations, standards, and accreditation requirements. Lead preparation efforts for inspections and joint commission accreditation surveys.
- Analyze annual budget for clinical services, ensuring alignment with organizational goals and financial targets.
- Ensure effective patient care coordination, including appointment scheduling, patient education, and follow-up care. Address patient concerns and ensure a positive patient experience.
- Maintain accurate and up-to-date patient records, clinical documentation, and data management systems. Utilize data to inform decision-making and improve clinical operations.
- Participate in strategic planning and goal-setting for the clinic, aligning clinical operations with organizational objectives and priorities.
- Develop and implement emergency preparedness plans, ensuring the clinic is equipped to handle crises and emergencies effectively.
- Oversee population health data to identify trends, evaluate performance (HEDIS/CMS STARS), and find opportunities for intervention.

AtlantiCare Regional Medical Center
Interim Director of Clinical Pharmacy and Population Health

May 2024 – November 2024

Atlantic City & Pomona, NJ

- Managed inpatient clinical pharmacy team, ambulatory MTDM pharmacy team, and population health pharmacists within the healthcare organization.
- Provided strategic leadership and management for the inpatient clinical pharmacy services and population health initiatives, ensuring the delivery of high-quality patient care and achieving organizational goals.
- Developed, implemented, and enforce system-wide clinical medication management policies and procedures, ensuring compliance with regulatory standards and best practices.
- Supervised the clinical operations of the pharmacy, including medication therapy management, patient counseling, and clinical interventions for inpatient and population health services. Ensure the safe and effective use of medications.
- Collaborated with pharmacy service line and other healthcare disciplines to create and implement new medication management workflows in the acute care setting.
- Managed budgeting and financial management for the clinical pharmacy services, including resource allocation, expense monitoring, and revenue forecasting.
- Represented the inpatient clinical pharmacy services and population health initiatives in the community, building relationships with external stakeholders, including patients, families, healthcare providers, and community organizations.
- Engaged in clinical research and contribute to the advancement of pharmacy practice. Provide education and training to pharmacy staff, healthcare providers, and patients on population health management and inpatient care.
- Developed and implemented population health programs aimed at improving health outcomes and reducing healthcare disparities. Utilize data and evidence-based practices to drive population health strategies within our Accountable Care Organization.
- Performed transition of care analysis for patients with a high risk of readmission and collaborated with skilled nursing facilities to expedite patient discharges when a medication barrier was identified.
- Developed and executed population health strategies, aligning them with organizational goals to improve patient care and reduce healthcare costs (HEDIS data, CMS 5-STAR measures).

AtlantiCare Regional Medical Center

May 2019 – June 2023

Pharmacy Acute Care Clinical Coordinator

Atlantic City & Pomona, NJ

- Performed clinical research projects to contribute to the advancement of pharmaceutical knowledge and practices. Analyzed data and presented findings to improve patient care.
- Monitored and evaluated the effectiveness of medication therapy management programs and participating in quality improvement initiatives to enhance patient safety.
- Co-chaired the medication management subcommittees and the Pharmacy and Therapeutics Committee.
- Executed drug use evaluations for medication management practice protocols and formulary additions.
- Enhanced and monitored clinical interventions for the pharmacy administration for improving workflow and quality improvement measures.
- Collaborated with clinical and non-clinical pharmacy staff to create medication workflow processes for new or high-risk medications.
- Created annual clinical competencies for inpatient pharmacy staff.
- Analyzed safety event reports pertaining to medication errors or “near-miss” events in collaboration with the medication safety officer.
- Developed and reviewed acute care medication management protocol and policies.
- Collaborated with the pharmacy informatics team for system enhancements including but not limited to, medication order and order sets, safety parameters for medication administration

Curriculum Vitae

pumps, pharmacist clinical documentation forms, and enhancing clinical information available in medication preparation programs.

AtlantiCare Regional Medical Center

August 2016 – May 2019

Ambulatory MTDM Clinic Team Lead

Atlantic City & Pomona, NJ

- Developed, implemented, and enforced clinical policies and procedures, ensuring compliance with regulatory standards and best practices.
- Reviewed and optimized patients' medication regimens to ensure efficacy, safety, and adherence. Identified and resolved potential drug-related problems through clinical protocol.
- Provided patients with information about their medications, including proper use, potential side effects, and interactions. Ensured patients understood their treatment plans and encouraged adherence.
- Performed medication titrations, refills, and ordered appropriate monitoring of anticoagulation therapy as an agent of the physician.
- Provided immunizations, health screenings, and lifestyle counseling to promote overall health and prevent disease.
- Worked closely with physicians, nurses, and other healthcare professionals to coordinate care and ensure patients received comprehensive treatment for their chronic disease states and high risk medication(s).

Philadelphia University/Jefferson University

Pharmacology I adjunct professor for physician assistants

March 2016 – December 2021

Atlantic City, NJ

- Conducted lectures pertaining to pharmacology, drug interactions, and therapeutic application.
- Provided guidance and mentorship to students, including academic advising and supporting research projects.

AtlantiCare Regional Medical Center

July 2014 – May 2019

Hospital Clinical Pharmacist

Pomona, NJ

- Evaluating medication orders for appropriateness, dosing, interactions, and potential adverse effects. Ensuring that patients receive the correct medications in the right dosages.
- Participating in patient rounds with healthcare teams, reviewing patient cases, and providing recommendations on medication therapy to optimize patient outcomes.
- Educating patients and their families about medications, including proper use, potential side effects, and interactions. Providing counseling to ensure patients understand their treatment plans.
- Serving as a resource for healthcare providers by offering up-to-date information on medications, including new drug therapies, guidelines, and best practices.
- Compounding and dispensing medications as needed, ensuring accurate preparation and delivery. Overseeing medication storage and inventory management to maintain supply and quality.
- Working closely with physicians, nurses, and other healthcare professionals to develop and implement individualized treatment plans for patients.

AtlantiCare Regional Medical Center

June 2013 – June 2014

PGY-1 Pharmacy Resident

Atlantic City, NJ

- Orientation
 - Introduction to hospital history, vision, and goals
 - Completed system and network training

- Completed training in sterile IV room for IV drug preparation techniques
- Worked with automated dispensing machines, narcotic safe, and other medication technology and support systems
- Attained Advanced Cardiovascular Life Support and Basic Life Support training and certifications
- Infectious Diseases
 - Monitored restricted antibiotic usage in the hospital daily
 - Evaluated for appropriateness of antibiotic usage in the intensive care unit daily and discussed alternative treatment options with the team during multidisciplinary intensive care unit rounds
 - Evaluated patients with the infectious disease attending physician
 - Monitored and dosed vancomycin therapy according to hospital protocol
 - Researched and presented on topics of interests to pharmacists and infection control committee
- Cardiology/Anticoagulation
 - Daily management of anticoagulation therapy for patients according to hospital protocol
 - Renal dose monitoring for patients with oral and IV anticoagulation therapy
 - Communicated with other healthcare professionals on monitoring and treatment recommendations based upon patient data
 - Provided drug information with evidence based medication searches
 - Provided informational documents for pharmacists on how to convert between anticoagulants
 - Provided patient counseling on warfarin, rivaroxaban, and enoxaparin use
 - Educated patients on Tikosyn® administration, adverse effects, and other special directions
- Critical Care
 - Analyzed patient data, optimized current therapies with renal dose adjustments or deletion of duplicate medications
 - Actively monitored patients on vancomycin or anticoagulation protocol
 - Rounded with medical team and made therapeutic interventions such as adding adjunctive therapies or recommending alternative therapies to best fit the patient's needs
 - Promoted antimicrobial stewardship by de-escalating therapies or narrow-spectrum antibiotics
 - Assisted nurses/physicians with drug ordering and facilitated drug deliveries
 - Addressed drug-information questions from medical team
- General Medicine
 - Analyzed patient data, optimized current therapies with renal dose adjustments or deletion of duplicate medications
 - Actively monitored patients on vancomycin or anticoagulation protocol
 - Provided patient counseling for patients with new or complicated drug regimens
 - Participated in drug topic discussions with the medical team
 - Recommended additions to therapies or therapeutic alternatives during daily rounds
 - Assisted nurses/physicians with drug ordering and facilitated drug deliveries
 - Precepted three 6th-year pharmacy students
 - Analyzed DKA patients – optimization of insulin drip and appropriate care
 - Counseled patients on new or existing drug regimens, modified current therapies to fit patient needs, and assisted with insurance issues at the Joslin diabetes center under the collaborative care agreement
 - Weekly ambulatory clinic practice at the infectious disease clinic (HIV/Hepatitis) – provided therapeutic recommendations, medication reconciliation, and patient counseling
- Emergency Department
 - Participated in BOOST rounds and discharge counseling

- Provided pharmacokinetic consult for medication therapies not normally administered in the emergency room setting
- Participated in “code blue” as a pharmacist provider (BCS/ACLS)
- Managed patients who had a stroke and required administration of thrombolytic therapy
- Provided an in-service on antibiotics started in the emergency room
- Shadowed emergency response teams on the field
- Managed all patient protocol started in the emergency room
- Managed patients on pain protocol and made therapeutic recommendations for patients who did not qualify for protocol
- Performed medication reconciliation
- Assisted nurses/physicians with drug ordering and facilitated drug deliveries
- Addressed drug-information questions from medical team
- **Oncology**
 - Monitored laboratory values to determine appropriateness of treatment
 - Reviewed resources and literature to determine appropriateness of new chemotherapy regimen initiations
 - Communicated with medical team to address adverse reactions
 - Counseled patients on treatment expectations and possible adverse effects
 - Performed medication reconciliation
 - Participated in regimen selection process based on patient’s medical history and treatment goals with the physician
 - Recommended additions and modifications to therapy based upon patient’s clinical onset and based them upon clinical trials or guideline recommendations
 - Compounded and prepared medications using aseptic technique and following high risk standards
 - Created and modified chemotherapy electronic order sets and the physician order sheet to reflect NCCN guideline recommendations
- **Ambulatory Care**
 - Performed medication reconciliation
 - Assist with transition of care for newly discharged patients by coordinating with inpatient providers and case management for appropriate follow up care
 - Performed basic physical exams with medical residents
 - Monitored laboratory values and recommended lab orders to determine appropriateness of treatment
 - Provided therapeutic recommendations and medication management plans based upon patient complaints/presentation
 - Provided lecture topics on pharmacology and pharmacotherapeutics to ambulatory medical staff
- **Longitudinal Rotations**
 - Attended ASHP Midyear Conference and present case report poster
 - Attend Eastern States Conference and present research project poster
 - Contribute to AtlantiCare Regional Medical Center’s enrollment process and participation in the Acute Medically Ill VTE Prevention With Extended Duration Betrixaban Study (APEX)
 - Worked with the informatics team to create new order sets and also assisted with the roll out of the new emergency department Cerner® system known as FirstNet® as a super-user
 - Attended multidisciplinary meetings and contribute to new administrative and clinical initiatives
 - Attended and contributed to the pharmacotherapeutics (P&T) meetings by presenting drug monographs, new initiatives, and keeping minutes

KENNARA SOK VUONG

Egg Harbor Township, NJ 08234

Mobile: (267) 266-3233

Curriculum Vitae

- o Worked as a staff pharmacist; profiling orders, checking medications, verifying accuracy of IV products, creating and maintain crash carts, handling the distribution of narcotics, making parenteral nutritional solution for neonates, and troubleshooting pharmacy-related issues and questions

Mercy Philadelphia Hospital

December 2012 – June 2013

Pharmacy Intern
Philadelphia, PA 19143

- Continued the projects started as a rotation student at the site and transitioned into a pharmacy intern
- Performed medication reconciliation, patient counseling, anticoagulation monitoring, medication informatics and inventory management

CVS/Pharmacy

August 2007 – May 2013

Pharmacy Intern
Philadelphia, PA 19147

- Interpret, process, and prepare prescriptions under the supervision of a licensed pharmacist.
- Communicate with healthcare professionals and insurance companies to resolve prescription processing issues
- Speak to physicians about therapeutic interchange or a request for the physician to perform a prior authorization
- Notify physicians and patients about gaps in a patient's therapy and suggest possible additions to therapy
- Assist in stock rotation, inventory management, and reviewing weekly and quarterly performance measures
- Register and monitor patients who receive high risk medications such as isotretinoin and clozapine onto the appropriate registry
- Counsel patients on prescription and nonprescription products under the supervision of the pharmacist
- Create weekly shift schedules for the pharmacy staff.
- Contribute and implement innovative ideas that ensure better workflow while staying committed to patient safety
