RESEARCH AND PUBLICATIONS

QI PROJECT: POSTER PRESENTATION

Advisor: Dr. Frederick Balzer

Drug Safety in the Operating Room: Decreasing the Incidence of Perioperative Adverse Drug Events

SPHENOPALATINE GANGLION BLOCK FOR TREATMENT OF POST DURAL PUNCTURE HEADACHE

Advisor: Dr. Adam Thaler

A randomized controlled trial comparing sphenopalatine ganglion block to conservative treatment for post dural puncture headaches in the obstetric population

PRESENTATIONS

COMMON ANESTHETIC COMPLICATIONS IN THE PACU

Lecture given to PACU nursing team. Topic was common postoperative complications, including diagnosis and treatment

COMMITTEES

CURRENT

PEER REVIEW COMMITTEE - HOLY CROSS HOSPITAL

Monthly meeting reviewing adverse outcomes involving anesthesiologist, including chart review, discussion of events and standard of care, and evaluating necessity of protocol changes

CURRENT

PREOPERATIVE MEDICATION GUIDELINES

Involves maintaining a list of medication guidelines for perioperative use, including which medication should be stopped prior to surgery, which medications should be continued and if surgery needs to be delayed or cancelled if the guidelines are not adhered to

(2014-2017)

ETHICS COMMITTEE - THOMAS JEFFERSON UNIVERSITY HOSPITAL

During my residency I served on a committee that reviewed ethical questions and cases in the hospital. It was a collaborative team that included administration, physicians from various specialties, nurses and residents. These cases involved end of life questions, autonomy, physician obligations and other various scenarios
