---	--------------

Clinical Innovations, Safety, and Quality Improvement Projects

- Developed and evaluated EPIC order sets to enhance medical student and resident learning and patient outcomes (2020–present)
- Created a new workflow for documenting causes of death in the Epic Death Note at the time of death for better accessibility and review.
- Helped establish Mock Code drills for Code Stroke to improve emergency preparedness.

- Proposed and implemented departmental efficiency improvements in the Department of Hospital Medicine.

QI Projects

Developed and evaluated innovative educational resources like EPIC order sets to enhance medical student and resident learning and patient outcomes. Health Alliance Leominster Hospital	2020-present
Evaluating Patient Satisfaction -project focused on assessing and improving patient satisfaction levels in a hospital setting. Surveys and feedback tools were used to gather patient perspectives on various aspects of care, including communication, wait times, and overall experience. The data collected was analyzed to identify key areas needing improvement. As a result of the project, targeted interventions were implemented, such as staff training and process optimizations.	2014
Preventing Seasonal Flu with Vaccination - This project aimed to increase the rate of seasonal flu vaccination among high-risk patient populations within the hospital. Strategies included staff education and easy access to vaccines during clinic visits.	2013

Presentations

Grand Rounds Presenter; Session Title: Pain management; Residents: 12; Session Length: 1 hour; Frequency: Annual	2014-present
Journey of Dabigatran, UMass Medical School, Worcester MA	2013
